EXPERIENCE

SDLC Corp Private Limited

Full Stack Developer

Feb 2024 – Present

India

Project: Arkain — Gaming Machine Fleet Management Platform

- Built a full-stack platform for remote monitoring, configuration, and control of gaming/arcade machines across multiple jurisdictions and locations.
- Developed 22 modular REST API services (Node.js, Express, Sequelize, MS SQL Server) for games, rollouts, lobby management, and fleet operations; authored 75+ database migrations.
- Implemented JWT authentication with role-based access control (RBAC) across 4 user roles, plus rate limiting, request validation, and Winston logging for production reliability.
- Integrated MQTT for real-time machine commands/telemetry and Server-Sent Events (SSE) for live push updates; used Redis for caching and rate limiting.
- Built a React 18 + Redux Toolkit admin SPA (16 modules) with auto JWT-refresh Axios client, role-based route guards, chunked Azure Blob uploads, Leaflet fleet maps, and Chart.js dashboards.

Project: Wadiaa — Crowdfunding Platform

- Developed a crowdfunding platform connecting investors (Regular, Business, Sophisticated) with fundraisers.
- Implemented KYC/KYB verification via MySimpleID, stepper-based campaign creation, and an admin dashboard.
- Built the full stack with React, Tailwind CSS, and MUI; integrated REST APIs and used Sequelize ORM (MySQL) for DB operations and migrations.

Project: Android POS Application with Odoo 18

- Developed a native Android POS application integrated with Odoo 18 ERP for retail operations.
- Implemented payment processing, refund management, and customer engagement features.
- Built the frontend with the Odoo OWL framework (JavaScript) and backend in Python (Odoo 18, PostgreSQL, REST APIs).

EDUCATION

Bachelor of Technology in Computer Science

Deogiri Institute of Engineering and Management Studies (DIEMS)

June 2023

Aurangabad, India

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, C, C++, HTML, CSS

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, Material UI, Semantic UI

Backend: Node.js, Express.js, Nest.js, REST API Design, MQTT, SSE

Architecture: Modular Architecture, RBAC, JWT Authentication, Real-time Messaging

Databases: MS SQL Server, MySQL, PostgreSQL, MongoDB, Redis

ORM: Sequelize

Cloud & DevOps: Azure Blob Storage, AWS (S3, EC2), Docker, CI/CD, Firebase

Concepts: Pagination, Rate Limiting, Caching, Logging, Chunked File Upload

Tools: Git, GitHub, Postman, Jira, VS Code, Vite
